(6) Allowance for doubtful accounts

Receivables are required to be categorized into “normal receivables” and “doubtful receivables” for the purpose of providing an allowance for doubtful accounts under prevailing accounting practice in Japan. Merchandise and supplies.....	primarily, the average method

(9) Investment securities

Investment securities consist of held-to-maturity investments, available-for-sale securities with market quotation, available-for-sale securities without market quotation.

Held-to-maturity investments are valued at cost, adjusted for the amortization of premium or the accretion of discounts based on straight line method.

Available-for-sale securities with market quotation are valued at market value. Unrealized holding gains, net of tax, are recognized in “Unrealized gain on available-for-sale securities” as a separate component of net assets.

Available-for-sale securities without market quotation are stated at cost.

The cost of available-for-sale securities sold is principally based on the moving average method.

Notes to Consolidated Financial Statements

NS Solutions Corporation and Consolidated Subsidiaries

(10) Property and Equipment

Property and equipment are recorded at cost, net of accumulated depreciation of ¥7,451 million and ¥8,966 million (\$89,486 thousand) at March 31, 2007 and 2008 respectively. Depreciation on property and equipment is computed principally using the declining-balance method over the estimated useful lives of the assets. However, depreciation of buildings (except for building improvements) acquired on or after April 1, 1998, is computed using the straight line method.

Property and equipment for lease operations are depreciated on the straight line method over the period of the lease contract term with no residual value.

(11) Intangible fixed assets and long-term prepaid expenses

Amortization of intangible fixed assets and long-term prepaid expenses is computed using the straight line method over the estimated useful lives of the assets. Software costs for internal use are amortized over their estimated useful lives (less than 5 years) on a straight line basis.

(12) Goodwill

Goodwill arising from mergers, which represents the excess of the purchase price over the fair value of net assets acquired, had been amortized on a straight line basis over the respective estimated useful lives. When its amount is not material, it is charged to expense as incurred.

(13) Income taxes

Income taxes consist of corporate income taxes, local inhabitants taxes and enterprise taxes. The Company calculates and records income taxes payable based on taxable income determined in accordance with the applicable tax laws.

The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities.

(14) Retirement benefits

(a) Accrued employees' retirement benefits

The employees of the Company are generally covered by defined benefit pension plan under which retiring employees are entitled to lump-sum payments determined by reference to current rates of pay, length of service and conditions under which the termination occurs.

Actuarial gains (losses) are charged to income or expense as incurred.

(b) Allowance for directors' retirement benefits

An allowance for retirement benefits to directors and corporate auditors of the Company and its consolidated subsidiaries is calculated based on the Companies' internal rules and the estimated amount which would be payable if all directors and corporate auditors retired at the relevant balance sheet date.

(15) Accrued bonuses to employees

Accrued bonuses to employees are provided at the estimated amount which the Company is obliged to pay employees after fiscal year-end, based on their service for the fiscal year ended on the relevant balance sheet date.

(16) Accounting for finance lease transactions

Finance lease transactions, except for those which are deemed to transfer ownership of the leased assets to lessees, are accounted for as operating lease transactions.

(17) Per share information

Net income per share of common stock is computed based on the weighted average number of outstanding shares of common stock during the respective periods. Under the Statement of Financial Accounting Standard No. 2 "Net income per Share" issued by the Accounting Standards Board of Japan, net income should be adjusted by deducting the payment of dividends to shareholders of preferred stocks to be recognized as an appropriation of retained earnings, from net income shown in the statements of income, and the computation of net income per share be made on that adjusted net income basis. Since no convertible bonds or warrants were issued and outstanding, there was no dilutive effect on net income per share during these periods.

The average number of shares outstanding used in the computation was 52,998 thousand for the fiscal years ended March 31, 2007 and 2008, respectively.

Net assets per share is computed without Minority interests.

(18) Accounting for consumption tax

Consumption tax is excluded from the figures of the accompanying financial statements.

9. Property and Equipment

Land used for business purposes was revalued in accordance with the “Law Concerning the Revaluation of Land” as at March 31, 2000. Under the law, Japanese companies were allowed to revalue the land used for business purposes to fair value only for the limited period during the year ended March 31, 1998 to March 31, 2001. Unrealized gains and losses were charged directly to net assets, rather than to the income statement. Application of the law was voluntary, but permitted only one time during the three-year period.

The detail of the revaluation is as follows:

- Method of revaluation
The calculations were made in accordance with the “Law Concerning the Revaluation of Land”.
